## Workshops/ Hands - on Trainings offered

- Basic Microbial Techniques
- Applied Microbiology
- Basic Molecular Biology Techniques
- Recombinant DNA Techniques
- Vermitechnology
- Antimicrobial assays

## Where we can help?

Training Programs will be tailor made to cater to PUC, UG, PG students and Research Scholars

## About Us

The need for an interdisciplinary programme in Biology at the Post-Graduate level, led to the establishment of the M. Sc. Life Science Department at Mount Carmel College in the year 2007. The course covers various basic and applied aspects of Biological Sciences. Such a holistic approach to the study of Biology is unique and very few Universities and Colleges across the country offer similar programmes. The department offers UG, PG and Ph.D programs

## Expertise of the Faculty members

- Probiotics & Prebiotics, Microbial Bioremediation, Vermitechnology, Fermentation Technology, Chemical Ecology, Antimicrobial Assay, Animal Behaviour
