MOUNT CARMEL COLLEGE, AUTONOMOUS
BIOTECHNOLOGY RESEARCH CONSULTANCY

The Department of Biotechnology at Mount Carmel College provides state of art research solutions in the field of Biotechnology. The facility is open to researchers from both academia and industry.

Vision

The state-of-the-art equipment knowledge allows us to offer users with cutting-edge technology and superior services that facilitate and promote research operations.

Mission

- To provide superior quality services.
- To assist with recent technology.
- To encourage the development of novel applications
- To assist users in their research.

Available resources

Soxhlet apparatus

Ethanolic extracts
Methanolic extracts

Animal and Plant Tissue culture facilities

Other facilities

- PCR
- Protein estimation
- UV spectrophotometry
- DNA isolation
- Protein purification
- Molecular biology consultation for schools and colleges

Previous consultations

A successful 3-day hands-on training in **'Molecular Biology Techniques'** was conducted for the students of Legacy School from 23rd to 25th November 2023
